17:35–19:00	Showcase & Networking	Dinner (Korean Food)

2025 ACE.SG X KSC GLOBAL IR DAY.

YOU ARE CORDIALLY INVITED 2025 ACE.SG X KSC GLOBAL IR DAY.

WED 5TH NOVEMBER 2025 **ACE Ideation Centre**
4 PM Onwards

- 79 Ayer Rajah Crescent, #01-13 JTC Launchpad@one-north, Singapore 139955

FOCUS

The **Korea Startup Center (KSC)** and **Action Community for Entrepreneurship (ACE.SG)** are proud to co-host the ACE & KSC IR-Day 2025. As we approach the end of another exciting year, this joint event celebrates innovation and collaboration between Korea and Singapore’s startup ecosystems.

Through startup pitching, performance sharing, and networking, we aim to strengthen cross-border partnerships and explore new opportunities for global growth.

Action Community for Entrepreneurship (ACE.SG) is the national voice for the Singapore startup ecosystem, and a key trade association representing the interests of startups in Singapore. Working closely with the Government and startups, ACE.SG aims to promote entrepreneurship, catalyse new growth opportunities, and scale startups. ACE.SG is also the appointed operator of Stage One, an initiative jointly led by Enterprise Singapore and the Singapore Economic Development Board, with support from JTC Corporation. Stage One serves as a one-stop platform to bring together the local and global community of startups.

K-Startup Center(KSC) Singapore is operated by the Ministry of SMEs and Startups (MSS) and the Korea SMEs & Startups Agency (KOSME). It is the first Korean startup-supporting platform established in Southeast Asia. KSC Singapore plays a vital role as a Launchpad for Korean SMEs and Startups plugging into the startup ecosystem in Singapore and Southeast Asia.

2025 ACE.SG X KSC GLOBAL IR DAY.

Ailytics

Ailytics

Vision AI system to enhance operational safety, productivity and security for heavy industries with actionable insights with existing cameras.

**Eight Vectors**

Eight Vectors is a Singapore-based startup developing ZenitaAI, an edge-native AI platform that enhances operational efficiency in warehousing and logistics. ZenitaAI continuously monitors material handling equipment (MHE) and robot fleets, turning performance data into actionable intelligence. It predicts failures, recommends optimizations, and helps businesses maximize uptime, reduce maintenance costs, and protect millions in revenue.

Eight Vectors is now seeking strategic collaborations and partners to introduce ZenitaAI to South Korea's manufacturing and logistics ecosystem.

**ConnectingDNA**

ConnectingDNA is creating the world's first AI-powered DNA-Wellness Digital Infrastructure, that combines Digital Health Passport + Wellness Marketplace + DNA-Personalization SaaS Tools. Through this infrastructure, vendors will provide better products informed by clients' genetics, and consumers will get more visible results - binding them together through our platform using smart recommendations, behavioural reinforcement, and data-driven trust.

**QuikBot Technologies**

QuikBot Technologies solves the persistent challenges of last mile logistics, where manpower shortages, congestion, and inefficiencies strain urban delivery systems. We offer the world's first Agentic-AI Powered Interoperable Robotics Platform, combining autonomous delivery robots, mobile smart lockers, and AI fleet management to automate secure deliveries across floor to floor and building to building environments. By integrating directly with smart building infrastructure and IoT systems, QuikBot enables seamless, scalable automation. Our impact lies in helping logistics providers, banks, hospitals, and property developers reduce reliance on labour, cut carbon emissions, and create more sustainable and efficient smart city ecosystems.

**Tictag (Tagteam Technologies Pte. Ltd.)**

Tictag is an AI company that helps organisations transform video and sensor data into actionable insights. Our platform, Tictag Insight, powers real-time analytics for retail, mobility, and smart city environments, combining computer vision with an LLM-driven analytics agent that turns raw footage into decisions. Headquartered in Singapore, Tictag has expanded rapidly across Korea, Indonesia, Vietnam, and Japan, working with clients such as Lotte Duty Free, Changi Airport Group, and A*STAR.

We have been very active in the Korean market, from partnerships under the KISED and NIPA programs to collaborations with local partners and companies, especially under the Data Voucher programme, and are keen to continue growing our footprint there. We are a certified Data Voucher and AI Voucher supplier.

**Injewelme**

injewelme is an AI Health Tech company that simplifies personalised preventive care. Our proprietary DeepHealthVision (DHV) facial scan uses a mobile camera to capture critical health vitals non-invasively and with over 96% live accuracy. By combining this data with our DeepHealthNet AI prediction model, we deliver continuous health insights and bridge the data gap, empowering users and professionals to take proactive action toward wellness.

**PIA space**

PIA space provides an VLM + Vision AI based video analytic solution that analyzes video footage from drones, robots, and CCTV cameras in real time, enabling clients to respond proactively to emergencies such as crimes or disasters.

**AITRICS Co., Ltd.**

AITRICS provides AI-powered Clinical Decision Support System (CDSS) and LLM-based Virtual Doctor solutions. With its technologies spanning from early detection of patient deterioration in hospitals to remote patient monitoring, AITRICS supports clinicians in advancing patient outcomes and operational efficiency worldwide.

**Sicpama**

SicPama helps restaurants track ad-to-customer conversions and identify key diners who drive repeat visits—boosting sales and loyalty. Powering Raptor POS across 11,000+ outlets in 8 SEA countries, we're now expanding from Singapore and Korea to Malaysia, the Philippines, and Indonesia.

**MONIT**

Every nurse wastes hours checking diapers. We cut that by 84%. That's not just efficiency—that's the future of elderly care." We are MONIT, spun out from Samsung in 2017. Our AI-powered smart diaper subscription system is transforming elderly care across Asia. Our proof points are solid: Korea: 85% government subsidy as an innovative welfare device Japan: 1 million units delivered to HeartCare, expanding nationwide Singapore: Already partnered with SingHealth, KTPH, IMH, TTSH, and RCA.

Why this matters: By 2054, the global elderly population hits 1.7 billion. There will be a 10-million caregiver shortage. We're not filling a gap—we're creating a new market category. Our impact: 100% pressure ulcer prevention, 84% reduced manual checks, 25% cost savings per facility, recurring revenue. This is happening now in Korea, Japan, and Singapore. The question is: will you be part of it?
