A

Alexandria Research

Enables technical students, founders, and
investors to discuss groundbreaking research
with the original authors of a paper.

GENERAL Ⓖ CATALYST   Hummingbird   *Interface*   468 Capital   HEARTCORE

What is a Research Circle?

Each circle discusses a groundbreaking deeptech technology and a related research paper.

The paper is presented by the main researchers behind it and by founders who build on top of the technology.

We limited participants to 20 technical students and founders to ensure a place for high-signal discussion.

We solely discuss deep-tech advancements in spaces such as machine learning, robotics, biotech, compute, energy...

We previously hosted researchers and founders from world leading labs.
