# About us

The Global Rapid Accelerator Program offers a unique opportunity for startups from all over the world to accelerate their growth, make valuable connections, and expand their market reach, particularly in the American market. Launched just a year ago, the program has already proven to be a success, with its first cohort receiving resounding praise. Participating startups gain access to industry leaders, mentorship, and resources that help them overcome challenges and achieve new levels of success. The program is designed to drive innovation and create lasting global impact.

# SyncTech

SyncTech is a visual first claims platform that fuses 3D imaging, drone data, geospatial data, and AI to automate damage detection and reporting. We standardise data capture, eliminate duplicate site visits and hand insurers a live digital replica of every property. This results in faster, more accurate decisions, double-digit cost savings and a claims experience that brings clarity and trust to customers.

**Country:** Australia

# Maisha Poa

MaishaPoa is a tech-driven micro-insurance provider addressing the healthcare and financial security gaps among Kenya's low- and middle-income households. We design and distribute microinsurance products and licensed as an intermediary in Kenya. Since its inception in 2022, MaishaPoa has provided accessible and affordable insurance solutions, empowering underserved communities to access essential healthcare without the burden of high out-of-pocket costs.

**Country:** Kenya, Africa

# synapze

At Synapze, we make AI automation simple, secure, and accessible for financial services. Our TinyAI models run efficiently on your infrastructure—no GPUs or cloud needed—helping you streamline compliance and operations with privacy-first, explainable AI.

**Website:** <https://www.synapze.io>

**Country:** Germany

# Agrikalpay

Agrikalpay is a cutting-edge platform and electronic wallet for farmers, designed to secure transactions, simplify payments within any agricultural value chains, and enhance financial inclusion. By leveraging blockchain-based smart contracts, satellite monitoring and AI-powered risk assessment, our platform enables farmers in emerging markets to digitize their financial transactions while accessing affordable loans and insurance coverage tailored to their needs. Agrikalpay automates premium payments, loan repayment, claim processing, and real-time monitoring, ensuring trust, transparency, and efficiency in agricultural finance. Currently, we operate within the pineapple agricultural value chain in Benin, with expansion plans to other emerging markets in Africa and Latin America.

**Country:** Bénin

# Yelen Fintech

Yelen Fintech is a pan-African technology company that aims to build the technological infrastructure to accelerate financial and insurance inclusion. The company provides end-to-end digital solutions to modernize the insurance and financial services value chains.

**Website:** <https://www.yelen-fintech.com/>

**Country:** Burkina Faso

# BirdsEyeView

BirdsEyeView is a European Space Agency funded InsurTech providing Natural Catastrophe Modelling & Exposure Management Software for insurers.

**Website:** [www.birdseyeview.ai](http://www.birdseyeview.ai)

**Country:** London, United Kingdom

# Finerty

Finerty provides an open finance platform that enables consumers to validate and securely share their pension, investment and insurance data with advisors in real time. Currently, the process of obtaining data is a significant pain point for advisors, who spend 3-8 weeks manually collecting financial information through cumbersome 'Letter of Authority' or 'Information Mandate' processes that involve approximately 30 copy-paste steps. Finerty fully automates information requests, saving Financial Institutions and Advisors millions of manual labour hours.

**Country:** Ireland

# GWTInsight

GWTInsight is a commercial building data service company serving the insurance industry, delivering SaaS enabled embedded insurance for commercial property. Capturing real-time data such as HVAC, boiler, electrical and fire, detecting changes that could lead to increased risk of losses that could be prevented. We are launching an MGA to deliver new commercial building insurance products which utilise our proven technology to monitor building performance aligned to property risks and perils. Our MGA also provides data to drive new insurance services and revenue streams for brokers and carriers

**Country:** UK

# Cogniguard

Cogniguard is a pioneering medical technology company committed to transforming the treatment of Alzheimer's disease and Mild Cognitive Impairment (MCI). Our flagship product, Vguard, is an innovative, non-invasive therapy device designed for at-home use during sleep. By utilizing proprietary auricular vagus nerve stimulation (AVNS) protocols, Vguard enhances cognitive function, preserves memory, and slows the progression of cognitive decline while the brain undergoes vital restorative and memory consolidation processes. Early first-in-human studies have shown promising results, reinforcing our commitment to advancing groundbreaking solutions in cognitive health

**Country:** Poland

# StitchStudio

StitchStudio is an applied-AI platform built for carriers, MGAs, TPAs and brokers. Our studio lets teams assemble narrow, purpose-built AI agents—then stitch them directly into the existing workflows. A domain-rich insurance knowledge graph, deterministic guardrails, and single-tenant deployment keep every action accurate, auditable, and compliant.

**Website:** <https://stitchstudio.ai/>

**Country:** Portland, OR, US

# Ü Health

Ü Health is a digital health platform transforming access to healthcare in Mexico. We offer instant health insurance and preventive services through a mobile-first, subscription-based model focused on affordability, convenience, and social impact.

**Website:** <https://stitchstudio.ai/>

**Country:** Mexico

# Activar

Activar is an insurtech that delivers on-demand, pay-per-use insurance for multiple risk categories—including motorcycles, classic cars, ATVs, transport, home, and personal accident cover—through a single mobile-first platform. Users can toggle coverage on or off in seconds, paying only for the days they need, while enjoying full transparency and real-time human support. The platform is also available to insurance brokers and agents, who can offer our flexible products to their own clients with ease.

**Website:** <https://www.activar.app>

**Country:** Argentina

# Finnulate.ai

Finnulate, by FTN Solutions, is a GenAI-powered platform transforming compliance for insurers, banks, and fintechs, offering an overarching view of the enterprise-wide compliance spectrum—covering regulations, statutes, standards, and internal policies—while reducing misalignments by 40 percent. It automates 70 percent of tasks, cuts legal exposure by 35 percent with real-time health scores that strengthen compliance culture, and uses GenAI to guide management through the lifecycle with ease. Led by Mr. Dinesh Arora, a banking veteran with over 37 years of experience, Finnulate aims to showcase its innovation, forge global partnerships, and accelerate growth within the InsurTech ecosystem.

**Website:** <https://www.finnulate.ai>

**Country:** Delhi-NCR, Haryana, India

# Decision Computing

Decision Computing's AI agents identify the key drivers behind your core metrics such as loss ratios or NPS in real-time, uncovering information buried deep down in your text, image, tabular and location data. The reasoning process of the agents is transparent and auditable, so you can build confidence in the insights, run scenario analysis and take the right action to get your metrics back on track. Imagine having a team of data scientists on call 24/7 to stay on top of your KPI's and fix them on the fly.

**Website:** <https://decisioncomputing.ai/>

**Country:** Swiss

# Activo Labs

Activo Labs helps insurers and enterprises drive growth and improve health outcomes by passively analyzing user behavior, health signals, and lifestyle profiles. Our AI-powered platform maps each user to a dynamic persona, enabling personalized product recommendations, risk scoring, and engagement pathways that increase conversions, retention, and long-term health.

**Country:** Singapore, SG

**Activo Labs.**

# TRAK

TRAK is a company that has developed an artificial intelligence-powered digital rehabilitation clinic for musculoskeletal injuries. Its technology recognises more than 40 joint movements of the patient using their smartphone camera to accompany them in their treatment based on therapeutic exercise with real-time feedback. With TRAK, insurers are able to offer accessible treatments to their patients without waiting lists and reduce treatment costs by half.

Currently, the company works with leading healthcare entities in Spain such as Mapfre, Sanitas, Quiron Salud and Mutua Universal, consolidating its position as a leader in the national market. The company has started its international career with presence in large entities such as Keralty or Teladoc in LATAM and Europe.

**Country:** Spain

**TRAK.**

# Cleos

Cleos Welt is an innovative MGA based in Hamburg, Germany. We are specialized in pet insurance products with already more than 25,000 insured animals.

With our cloud-based software and our data-driven processes, we can create products in just a few weeks, even as white-label products and embedded insurance solutions (insurance as a Service).

**Website:** [www.cleos.de](http://www.cleos.de)

**Country:** Hamburg, HH

# Sento

Sento is a Conversational Intelligence platform that transforms 100% of customer calls into actionable insights. By using AI to analyze conversations at scale, Sento helps any contact center operations improve sales performance, elevate customer experience, and ensure compliance. Today, less than 2% of voice calls in the insurance industry are audited. This exposes insurers to regulatory risk, operational inefficiencies, and lost revenue potential. SENTO uses advanced generative AI to analyze 100% of interactions across voice, chat, and email, delivering actionable insights without manual processes.

**Website:** <https://sento-ai.com/>

**Country:** Guatemala

# Caelus.space

Caelus empowers insurers with AI-driven satellite intelligence to detect ground movement and infrastructure threats before they escalate. Our continuous, global monitoring system delivers predictive insights and real-time alerts helping you mitigate risk, reduce claims, and protect policyholder assets with unmatched foresight.

**Website:** <https://www.caelus.space/>

**Country:** Israel
