P.H: 82-10-6376-3665
E-Mail: roger@stockeeper.co

FUNDING ROUND

Series B
USD 7mn/USD28 mn(pre)

TEAM

AN JAEHYUN

CEO

- Former Livestock Trader at Hanhwa Corp
- Former Overseas Marketer at Intromedic America

PARK SEUNG-CHAN, CFA

COO

- Former Sr. Associate at Bank of America
- Former Investment Associate at E-UM Private Equity

PROBELM

- Difficulty for farmers to access stable financing for cattle breeding, farm facility development and management
- Fluctuative cow market prices make farmers vulnerable to earnings volitility and dampens appetite to reinvest
- Lack of transparent, scalable, and liquidable investment vehicle in the Korean/ASEAN livestocks investment
- Individuals have limited platform to participate in the real livestock ecosystem and investments.

OPPORTUNITY

- Korea's Hanwoo(Korean Cow) market is valued at USD 18Bn(4Mn Cattles)
- Low utilization (~30%) of the barn space and farm facility
- Higher value lies in vertical integration of livestock chain. Currently nascent

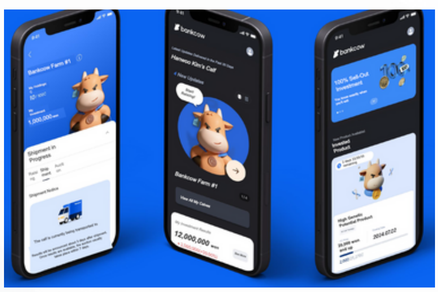
ADVANTAGE

- One and only licensed STO investment platform for live Hanwoo cattle
- Real-time tracking of livestocks and their score evaluation
- Full-cycle integration across farming, processing, and retail

SOLUTION

- Our STO helps the under-utilized farm assets to enhance productivity
- Farmers benefit from easier access to capital, and investors increase returns from smarter farm management
- Ensures a transparent livestock ecosystem
- Delivers consistent quality and rational priced beef to consumers

bankcow



BUSINESS MODEL

- Livestock STO issuance & management
- Real time data-driven herd operation and mgt
- B2B2C sale of meat products, leveraging automated processing and distribution
- Mid-term plans to expand STO/RWA into other product categories

HIGHLIGHTS

- Korea's first licensed livestock finance platform
- ₩10B+($7M) Acc. AUM,
- Integrated value chain: Bankcow–Gogi Design Lab–Honest Hanwoo
- Preparing for global STO listing

wavebridge

Wavebridge is Korea's first licensed digital asset prime broker, trading within the regulations and provides custody services for institutions. With a VASP license in Korea, MiCA licensing in progress in EU, and advisory partnerships in HK, we bridge traditional finance and digital assets

Contact Infomation

Web: www.wavebridge.com
P.H: +82-10-9165-5816
E-Mail: taeheum.cho@wavebridge.com

FUNDING ROUND

Series B
USD 8mn/USD90 mn (Pre)

TEAM

OH JONGWOOK

CEO / Co-founder

- Co-Founder of QARASoft (CFO)
- Former Head of Fixed Income Trading, Mirae Asset Securities & Samsung Securities

LEE JIHOON

COO / Co-founder

- Former Quant Trader, Korea Investment & Securities

CHO TAEHEUM

EU CEO / Co-founder

- Former Quant Trader, Mirae Asset Daewoo & KB Securities

PROBELM

- Limited institutional access to the digital asset exchanges which are highly regulated
- Insufficient liquidity for large-scale transactions, and early stage prime brokerage services
- Few compliance-ready infrastructure for corporates
- Shortage of professional trading expertise in digital assets

OPPORTUNITY

- Korea's Digital Asset Basic Act and EU MiCA are reshaping global standards
- Growing institutional adoption of digital assets, accelerated by ETFs and regulatory clarity

SOLUTION

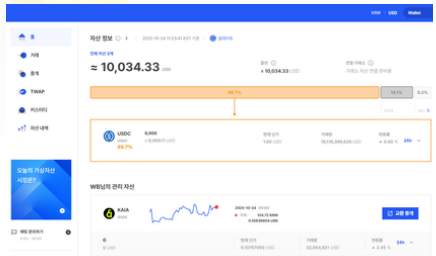
- Wavebridge Prime (KR & Global): All-in-one prime brokerage platform offering execution, liquidity, custody, and compliance
- Global Connectivity: Headquartered in Korea, extending regulated infrastructure into EU and supporting cross-border partnerships in Asia

BUSINESS MODEL

- Prime brokerage and custody service fees
- Compliance-driven advisory revenues

ADVANTAGE

- Solid leadership due to licenses in the sregulatory environment
- Korea: The only licensed institutional prime broker positioned to support Bitcoin ETFs and corporate adoption.
- EU/Asia: MiCa licensing in progress and advisory partnership with Victory Securities in Hong Kong.



HIGHLIGHTS

- Korea's only licensed institutional prime broker (VASP + ISMS)
- Advisory partner to Victory Securities (HK)
- Among the first MiCA-licensed CASPs in the EU (Lithuania in progress)
- Bridging Asia and Europe through unified compliance and institutional standards

FJL

Forest Jalan builds a Southeast Asian private-credit RWA platform that tokenizes short-term receivables (EWA, merchant SCF) from Indonesian MSMEs and makes them investable to global stablecoin capital, with real-time data visibility

Contact Infomation

Web: www.forestjalan.com
P.H: +82-10-3552-7688
E-Mail: jim.lee@forjl.com

FUNDING ROUND

Seed and LP for RWA fund

TEAM

LEE JUNSUP
CEO
Serial Entrepreneur(3x exit) and former Strategy and AI Product Owner at NAVER

LEE JIM
Co-founder
Former VP @ Evercore IB NY

LEE JONGGUN
Co-founder/Product Owner
Former Data Science Leader at United Nation

LEE JAEHUN
Co-founder/Product Owner
Former VP at Legend Capital VC

PROBELM

- **Web 3.0 investors:** Polarization in yield generating Web 3.0 assets (high risk/return with price volatility in DeFi and low risk/return treasury backed RWA assets)
- **Indonesian MSME Borrowers:** Lack of collateral and credit history resulting in lack of transparent lending solutions (Indonesian funding gap $154B); challenges include cash shortages before payday, lack of credit card access, and limited household liquidity

OPPORTUNITY

- Bridge Web3 liquidity to Web2 borrowers via tokenized private credit backed by receivables, targeting 13–17% APR
- Positive early traction: raised $200k pilot and completed tokenization; additional $1M committed.

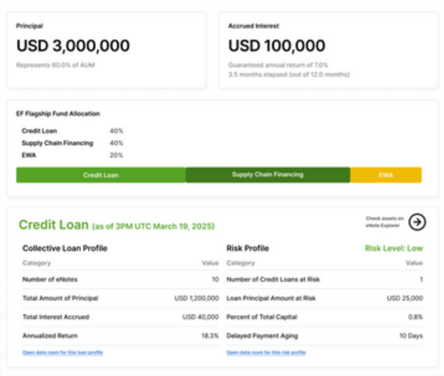
ADVANTAGE

- Proprietary borrower and data sourcing from JOOB (Grab-partner merchant/job platform)
- Real-time investor portfolio dashboard (allocation, asset profile, delays/NPL aging)
- De-risked structure: FX and NPL backstops

SOLUTION

- Investable real world asset token with MSME loan pool as the underlying asset (eNote Finance)
- End-borrower / proprietary data from Grab JOOB

<Real-time dashboard of MSME loans>



BUSINESS MODEL

- Operate JOOB job portal app with Grab
- Source & assess MSME borrowers from JOOB
- Lend to MSMEs with stablecoin from Web 3.0
- Real-time borrower data visible to investors
- All transactions and capital flow on blockchain

HIGHLIGHTS

- Investable private credit RWA asset generating 13-17% yield irrespective of crypto market volatility
- Real time data of the underlying asset that gauges risk level

DeepSearch

DeepSearch provides 'Finorma', a Finance AI engine, enabling the financial institutions to easily build their own AI-based investment services and solutions by automating complex analysis of vast, real-time financial data

Contact Infomation

Web: www.deepsearch.com
P.H: 82-10-5122-3415
E-Mail: jay@deepsearch.com

FUNDING ROUND

Pre-IPO
$7M / $70M (Pre)

TEAM

Jay Kim, CEO

- KICPA
- AI Advisor for NPS
- Ex-VC @Partners VC
- Ex-Deloitte
- Ex-Lead Developer @ Naver

Kay Kim, COO/CFO

- KICPA
- Ex-CFO @Finda, Buzzvil,
- Ex-Coupang
- Ex-Deloitte

SJ Kim, CTO/CPO

- Ex-CTO @ Goodoc
- Ex-Lead Developer @ Zigbang
- Founding Member @ UJET

PROBLEM

- Inefficiency in processing vast, complex, and scattered financial data, news, and macro indicators.
- Difficult for financial companies to organically build financial AI engine and solutions due to limited cost, time, and expertise.
- Limited analytical coverage due to capacity constraints in human resource.

OPPORTUNITY

- Effectively and quickly integrate AI to offer innovative financial solutions
- Untapped market potentials by expanding analytical reach outside the traditional assets
- Higher efficiency from lower cost

ADVANTAGE

- Proven in a highly advanced financial market (South Korea)
- Adoption rate (~40%) by major Korean financial institutions such as NPS, KRX, top banks (Shinhan, KB), and securities firms (Korea Inv't & Sec, Samsung Sec)

SOLUTION

Finorma API (FAaaS)

- A comprehensive Financial AI SaaS that allows financial institutions to easily build their own AI-powered services
- Instant access to extensive, real-time financial data
- Includes stocks, ETFs, news, filings (KR/US), earnings calls, macro indicators, patents, and ESG data

AI-Powered Features

- Intelligent Q&A
- Personalized briefin
- Risk monitoring & alerts
- Automated research

BUSINESS MODEL

B2B API Licensing

- License 'Finorma' engine and specialized Financial AI Agents (aka AI Analyst, AI Investment Manager) via our API
- Enables clients to rapidly build and deploy sophisticated AI financial services that is real-time and automated. Value creations from quality work, time and cost reduction

HIGHLIGHTS

- FY25 Sales USD 4 Mn, FY25 CAGR 30%
- Unique Technology
- Proven track record
- FAaaS ready

Host

FINTECH CENTER KOREA

Fintech Center Korea supports the growth of South Korea's fintech industry by fostering innovation and improving the financial ecosystem. It provides programs and resources for fintech companies, such as consulting for global expansion, investment promotion, and a "financial regulatory sandbox" to test new financial services.

kakaobank

KakaoBank is South Korea's leading mobile-only bank and a pioneer in mobile banking. Since its launch in 2016, KakaoBank has spearheaded IT-driven innovation in the Korean financial industry. The bank is known for its customer-centric approach and integration with other Kakao services like KakaoTalk and Kakao Pay.

Organizer

mysc

MYSC is a social impact startup accelerator in South Korea that supports social innovation through business. As of April 2023, MYSC cumulatively made 122 impact investment with total AUM of USD 35.4 million. In terms of accelerating, MYSC cultivated over 500 companies in the past 5 years.

LodestarT

LodestarT is a dynamic ecosystem builder and a collaborative platform bridging South Korea and Singapore. By connecting Korean startups with Singaporean investors and strategic partners, LodestarT facilitates various layers of cross-border collaboration, driving tangible growth for all stakeholders.
