>>> set the background gradient using darkgray, #262A76, and #A3D0D4 and  
animate the background gradient continuously and vigorously.

I'll update the background gradient to use darkgray, #262A76, and #A3D0D4  
with a more vigorous animation.

Done! I've updated the background gradient to use darkgray (#a9a9a9),  
#262A76, and #A3D0D4 with a much more vigorous animation. The animation  
now cycles through 4 keyframes in 4 seconds (instead of 6), creating  
faster, more dynamic movement across the background.
```

```
>>> Set the form title font and form labels font to "Plsyfair Display"
```

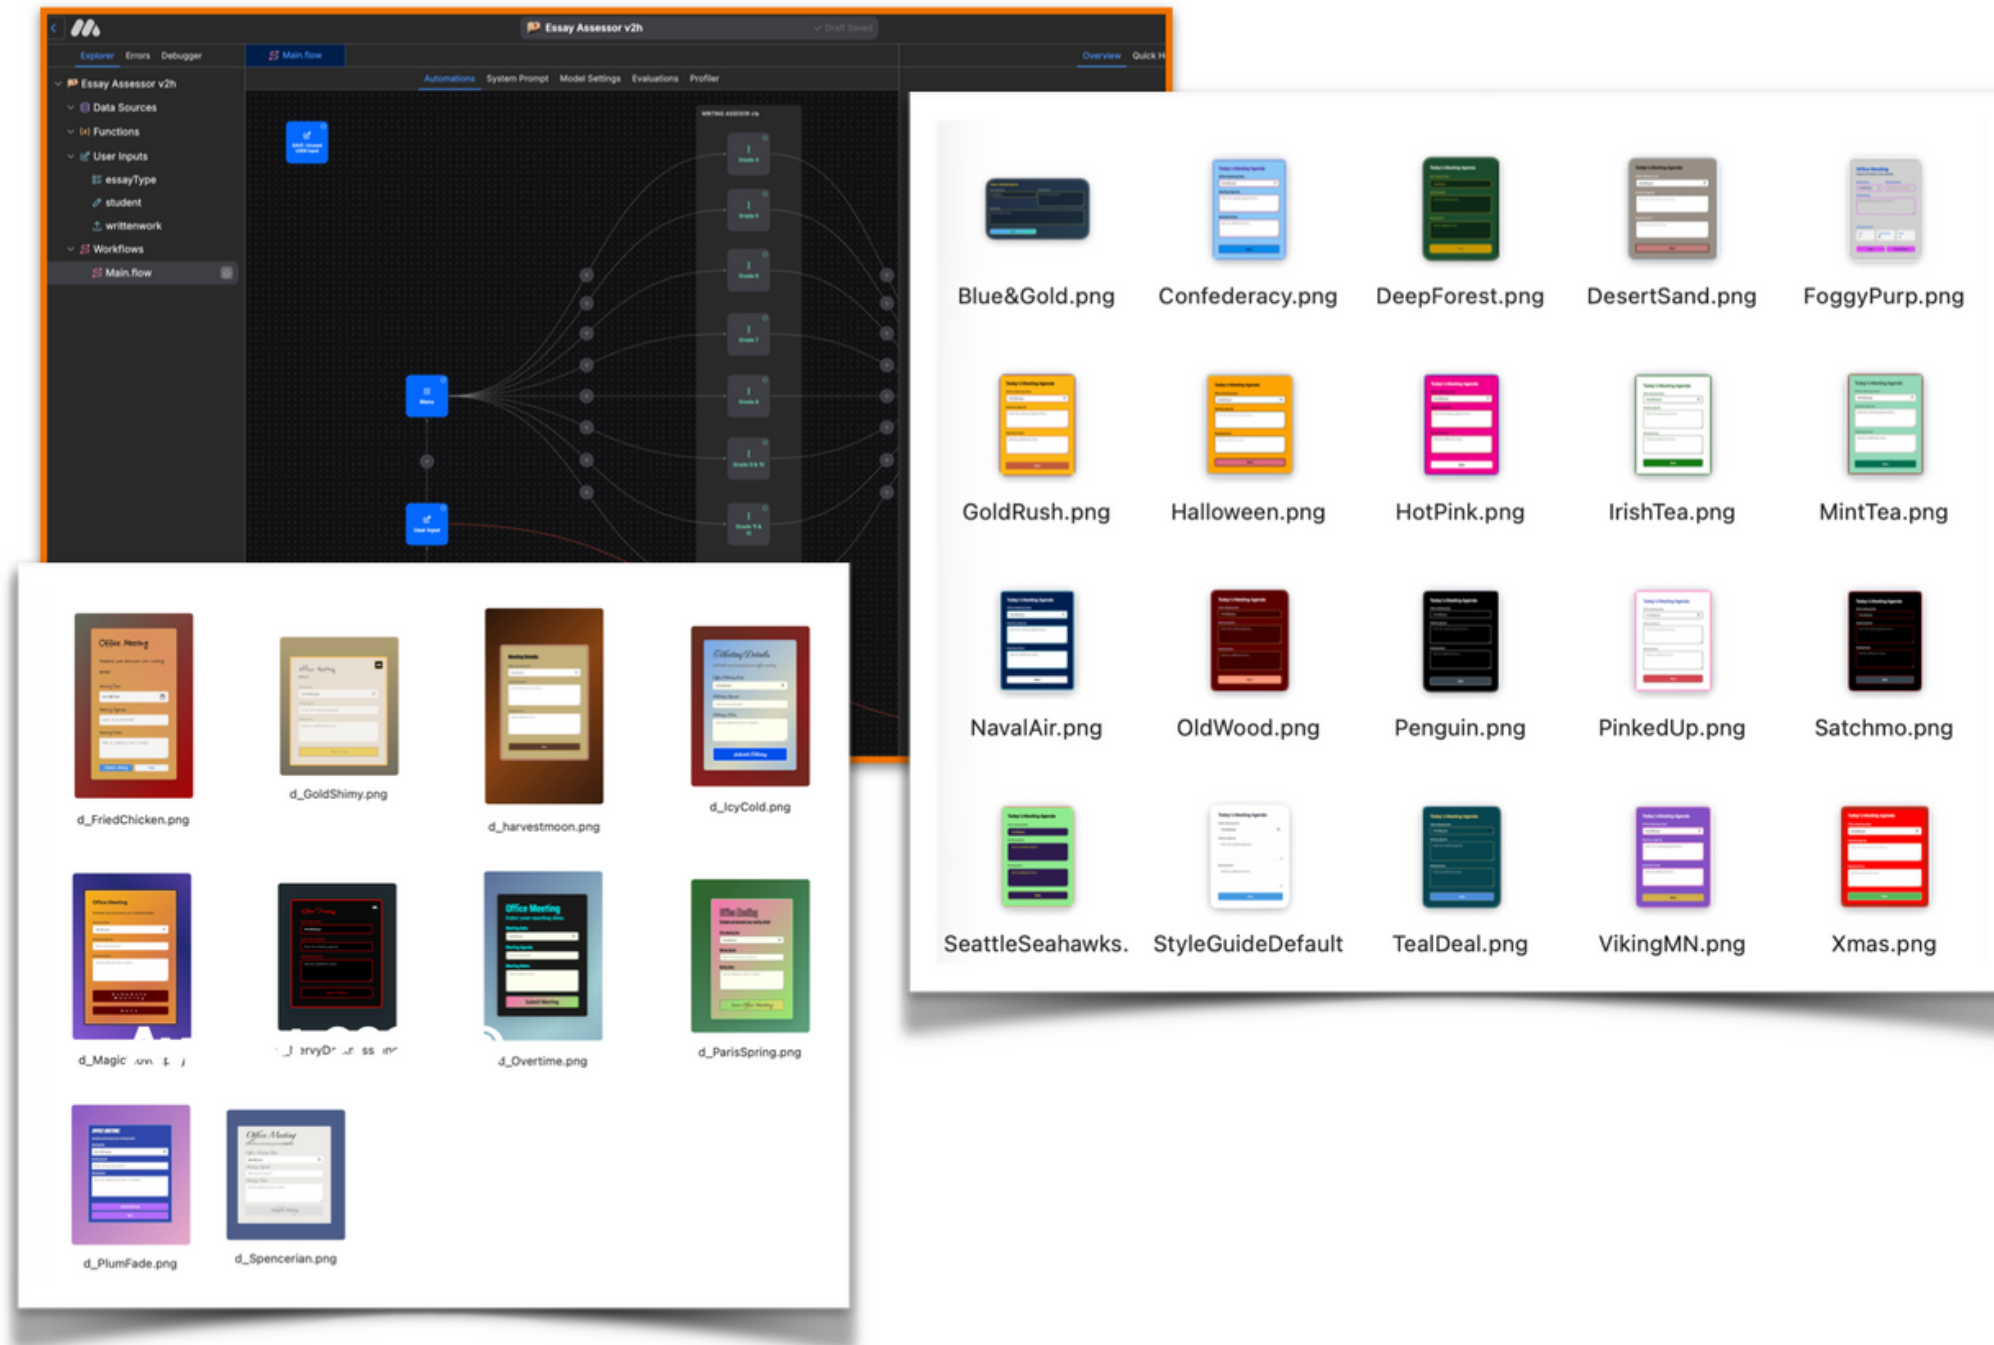

```
I'll update the form title and labels to use "Plsyfair Display" font
```
