

GOAL Autumn'26 Startups

BUY&SHIP

Buy&Ship is Asia's leading cross-border shopping platform for consumers and infrastructure backbone for next generation AI agents to shop globally.

Vertical - Brand & Retail
Stage - Series C

EzyGreenPak turns a plant-based water-soluble material into everyday products that dissolve in hot water, leaving no microplastics and no waste behind.

Vertical - Sustainability
Stage - Pre-Seed

On-us is an AI-powered incentives that help enterprises acquire, convert, retain, and grow customers by delivering the right incentive at the right moment.

Vertical - Fintech
Stage - Series A

Seekr is the spatial intelligence layer for complex spaces — hardware-free, GPS-independent positioning that locates users anywhere, while giving operators visibility into how their spaces are used.

Vertical - Travel & Hospitality
Stage - Pre-seed

Vlight AI is a product design AI agent for hardware founders to turn their idea into a tech product with AI — just like Lovable, but for physical products.

Vertical - Enterprise & AI, Supply Chain
Stage - Seed

AlleSense is developing NanoMslide™, a chemical-free imaging platform that reveals biological detail invisible to conventional microscopy, with AI-powered analysis unlocking new diagnostic and research applications.

Vertical - MedTech
Stage - Seed

Excelligent is a diagnostics company developing blood-based tests that detect Alzheimer's, Parkinson's, and other neurodegenerative diseases years earlier.

Vertical - MedTech
Stage - Pre-seed

Eolas DX is a single-use test for detecting sulphur dioxide (SO₂) in wine – a quick, easy-to-use, low-cost solution that delivers laboratory-quality results in the field without any dedicated equipment.

Vertical - AgTech
Stage - Seed

GOAL Autumn'26 Startups

EdGame is an AI-powered data analytics system that combines gaming with education. Monitors gameplay, collects and analyzes data, and provides detailed actionable insights.

Vertical - Enterprise & AI
Stage - Pre-seed

Sudo is a 24/7 plug-and-play device running a self-hosted AI agent. Talks over WhatsApp, Telegram, and more. No setup, yours to own.

Vertical - Enterprise & AI
Stage - Pre-seed

BUYBLE is the social platform that rewards genuine user reviews of everyday spending, connecting consumers and merchants through trusted, monetized word-of-mouth.

Vertical - Media & Advertising
Stage - Seed

Carbon Atlas helps climate projects in Saudi Arabia prove they qualify for carbon credits, replacing months of manual expert analysis with guided software.

Vertical - Sustainability
Stage - Pre-seed

ZPeer is an AI-powered peer-learning infrastructure that turns study groups into guided, measurable learning communities, AI facilitates the learning, students do it.

Vertical - Enterprise & AI
Stage - Pre-seed

Anlyvis turns existing cameras and IoT sensors into an edge AI "visual analysis operating system" that delivers real-time, privacy-first safety and operational intelligence for smart cities and enterprises.

Vertical - Smart Cities / Enterprise & AI
Stage - Seed

Palette Space develops practical, scalable AI products for enterprise workflows, spanning customer operations, sales training, visual content, legal, and architecture.

Vertical - Enterprise & AI
Stage - N/A

GOAL Autumn'26 Startups

Onemor enables fitness creators to turn Gen Z followers into paying subscribers through community-led distribution and gamified retention.

Vertical - Sports Tech
Stage - Pre-Seed

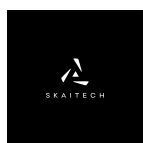

SAINNI AI finds the right prospects, helps you handle objections live, and automates follow-up, so lean B2B SaaS teams close more deals without adding sales headcount.

Vertical - Enterprise & AI
Stage - Pre-Seed

LekoTech helps automotive recyclers digitize, manage and sell original used spare parts across Europe through one connected platform.

Vertical - Mobility/Sustainability
Stage - Seed

SKAITECH develops autonomous drone systems, AI-powered aerial intelligence, and mission-ready UAV solutions for defense, security, infrastructure, and emergency response.

Vertical - Aerospace & Defense
Stage - Seed

SmartDose is transforming medication adherence with AI-powered technology that helps people take the right medication, at the right time, every time.

Vertical - Health
Stage - Pre-Seed

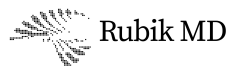

Vrtex is an AI market-intelligence system for research desks: 50,000+ multilingual outlets, autonomous monitoring agents, and cited executive dossiers in one workspace.

Vertical - Enterprise & AI
Stage - Pre-Seed

Drospect uses AI and drone imagery to automate solar inspections, turning data into actionable insights that improve revenue and reduce costs.

Vertical - Energy
Stage - Pre-Seed

RubikMD (Levita) is the quality assurance layer of healthcare: we review 100% of patient charts and surface clinical risk before it becomes patient harm, or a malpractice case.

Vertical - Health
Stage - Pre-Seed

At **écentic**, we make sure you win the cart when AI does the shopping.

Vertical - Brand & Retail
Stage - Pre-Seed

GOAL Autumn'26 Startups

Heyeve is an immersive legal tech platform offering AI-powered mock trials, judiciary interview training, legal consultation support, and a voice-driven chatbot assistant for legal education and courtroom readiness.

Vertical - EdTech
Stage - Seed

Harken Labs offers Hsieh, a unified omni-channel helpdesk platform that helps teams manage customer conversations across WhatsApp, email, social, and other channels in one human-first workspace.

Vertical - Media & Advertising
Stage - Seed

elevAID builds an interoperable healthcare infrastructure that unifies fragmented medical records, generates AI-powered summaries, and enables secure, permission-based data sharing across health systems, patients, and providers.

Vertical - MedTech
Stage - Seed

Recruit AI is an AI-powered recruitment operating system that unifies talent matching with agentic automation across outreach, screening, interview scheduling, and ATS workflows.

Vertical - Enterprise & AI
Stage - Seed

RLABS Immersive builds immersive XR worlds, simulators, digital twins, and synthetic data environments for training both humans and algorithms.

Vertical - DeepTech
Stage - Seed

Obelisk is an AI-powered platform that unifies cross-channel marketing, CRM, and ERP data with digital twin audience simulation and automated execution to maximize ROI across the entire customer pipeline.

Vertical - Enterprise & AI
Stage - Seed

CoBlack is an autonomous job search platform that finds verified jobs at the source, tailors an ATS-ready resume for each, and applies for you.

Vertical - Enterprise & AI
Stage - Seed

Nerdflow is an operational intelligence company building industry-specific AI products that run front-of-house operations, starting with ReceptAI for hospitality and restaurants.

Vertical - Enterprise & AI
Stage - Seed

AIDE AI is an AI grading platform for handwritten and typed student work that marks against Cambridge and Edexcel exam-board mark schemes, drafts feedback, and keeps final grading decisions with the teacher.
